Tailored to meet intensive operational requirements, the BSI-500KW-946kWh provides consistent three-phase power output, seamless solar-grid integration, and flexible hybrid modes.

Equipped with function control software, it can control the main operation parameter settings on the remote PC machine, and realize the energy flow between the battery and the power grid in a timely and two-way way.

It supports peak shaving and valley filling, demand-side response, backup power supply, and other major functions; it enables remote updates of operational strategies and firmware upgrades, resulting in lower ...

Each BESS container has either a 300kW or 500kW PCS system offering a complete, install ready energy storage system. All system systems are offered with either 400VAC or 480VAC 3 phase interconnect voltages.

Choose from 250kW up to 500kW total PCS power ratings and capacities ranging from 500kWh to 2200kWh. All-in-one design contains battery racks, PCS, EMS, HVAC, UPS, controls, networking, ...

This power - energy combination is designed to meet the demands of large - scale energy storage applications, providing substantial power output and energy capacity.

Whether you're dealing with variable loads, consumption that outpaces the grid, or noise issues with generators, these 500-kilowatt units can help. Our 500 kW batteries can be deployed in island mode, ...

greener solution for a more efficient performance. Our mid-node 500 kW/250 kWh Battery Energy Storage Systems (BESS) are designed to satisfy a variety of on and off-grid.

250kW/500kWh Outdoor Cabinet Energy Features High efficiency LFP energy storage, long life design Wide-voltage photovoltaic compatibility, intelligent temperature control system Modularized design, ...

500kW energy storage equipment output power

IBS215K energy storage battery cube is specially designed for the commercial and industrial energy storage and EV charging energy storage applications. It has 215kWh/280Ah energy capacity, 0.5P charge and ...
