Using Rome Airport as an example, the planned 2nd-life battery storage in combination with a PV system shows the way towards the goal of net-zero emissions in the local power supply. In addition, ...

The BESS now installed at Fiumicino Airport is powered by 762 battery modules from Mercedes-Benz, Nissan and Stellantis. The project using electric car batteries dates back to 2022, ...

Pioneer is the largest energy storage facility in Italy powered by second-life batteries, built to support the energy needs of Leonardo da Vinci Airport.

Italy's largest energy storage system based on used batteries for electric vehicles was inaugurated on Tuesday at Rome's Fiumicino airport to help it reduce carbon emissions.

The project will be developed at Rome Fiumicino International airport and the energy stored will cover evening peak-demand, while also providing flexibility services to the grid.

Rome's Fiumicino Airport, which sees over 50 million passengers each year, is giving new life to used electric car batteries. Through the PIONEER project, they are combining solar ...

As Italy's largest hybrid second-life battery energy storage system and one of the largest in Europe, Pioneer uniquely integrates batteries from Nissan, Mercedes-Benz, and Stellantis.

A unit of Enel plans to deploy 5MW/10MWh of second-life batteries at Rome-Fiumicino International Airport, where a 30MW solar park is now under development.

Italy's largest and busiest airport has integrated a total of 162 recycled Nissan Leaf and Stellantis batteries in an innovative battery energy storage system (BESS) to support its goal of...

5MW Modular Battery Cabinet Used at Italian Airport

Europe's largest airport solar-battery integration, boosting energy resilience and circular economy leadership. Rome's Fiumicino International Airport has launched Pioneer, Europe's largest ...
