By integrating solar power, energy storage, and artificial intelligence technologies, Amazon is leading the way in clean energy solutions. This groundbreaking project, located in ...

From investing in new carbon-free energy projects to advocating for grid modernization and collaborating with key stakeholders around the world, Amazon is working toward a cleaner energy future.

Amazon has enabled the development of 10 solar energy projects paired with battery energy storage systems to date - representing nearly 1.5 gigawatts (GW) of battery energy storage...

Virginia-based renewables developer AES Corp. has completed construction of the 1 GW first stage of the Bellefield solar-plus-storage site it is installing under contract from retail giant Amazon.

AES announced that it has completed construction of the 500-MW Bellefield 1 project, under a 15-year contract with Amazon in Kern County, California. Bellefield is a two-phase project, ...

Amazon has signed a power purchase agreement (PPA) to source power from AES from two of its new solar-plus-storage power plants in Adelanto, in California's San Bernadino County.

The completion of Bellefield 1 marks a major milestone in the U.S. transition to clean energy. Partnering with Amazon, AES is advancing the scalability of solar-plus-storage solutions, ...

Amazon has published details of a new battery energy storage system it will use at its Mojave Desert solar site to ensure minimal power disruptions in its bid to clean up and reduce...

Beginning this May, a football field-sized battery energy storage system (BESS) next to the solar panels will send electricity gathered during the day back to the grid, ensuring carbon-free ...

Amazon officials recently announced that its first solar farm-plus-battery energy storage project has become

fully operational in the High Desert.
