Amptricity launches the first solid-state technology for domestic energy storage, bringing to market a battery capacity deemed impossible before 2030

Amptricity, a developer and manufacturer of proprietary solid-state battery technology, announces its official launch today, demonstrating its residential system to coincide with the ...

A manufacturer with a proprietary solid state battery technology is emerging from stealth mode this week with a plan to deliver up to 4 GW energy storage systems within the next 30 months.

Amptricity just confirmed today that it will start sales of its first home battery model, equipped with solid electrolyte cells; an alternative that stands out for its safety features, but also...

Imagine a battery that doesn't catch fire when punctured, charges faster than you can finish your coffee, and lasts twice as long as your current phone battery. That's not sci-fi - it's Amptricity solid state ...

Sustainable Energy Storage Solution for the Utilities, Commercial and Residential. Amptricity's Solid-State Batteries with efficiency over 8 hours at 97%, non-flammable, 30 year warranty.

In this episode, meet Damir Perge, CEO of Miami-based Amptricity, a maker of solid-state battery technology, an electronic storage system that provides enough power for 8 hours of ...

Amptricity has announced what it says is the first solid-state battery for home energy storage. The company plans to deliver its first solid-state energy storage systems of up to 4 GWh or ...

Amptricity is the first solid state energy storage system in the world, enabling the planet to decarbonize faster than imaged possible. Learn how Amptricity can ...

Unlike the current lithium-ion technologies in the marketplace, Amptricity's solid-state technology allows for

Amptricity battery

up to 8-hours of discharge, and can charge and discharge simultaneously.

Our goal is to accelerate the adoption of electrification in the energy markets at warp speed by massively deploying proven, mass-production available, solid-state, disruptive battery storage technologies. ...
