This global solar energy movement is supported by the incredible, expansive solar farms that are being built around the globe. This SolarPower.Guide infographic explores the largest solar power plants in ...

Welcome to the Global Solar Atlas. Start exploring solar potential by clicking on the map. Select sites, draw rectangles or polygons by clicking the respective map controls. Calculate energy production for ...

The Global Energy and Renewables Map is an interactive web map where you can explore global power plants and U.S. solar and wind projects.

Photovoltaic systems account for the great majority of solar capacity installed in the world. CSP represents a minor share of solar power capacity, and is present in significant quantities only in a few ...

At the link below you can find a detailed description of the structure of our data pipeline, including links to all the code used to prepare data across Our World in Data.

Data and information about power plants and their location across the globe, plotted on an Interactive world map

Data and analysis including a list of solar power in every country in the world, countries with the most solar power, and countries that generate the highest percentage of their electricity from solar power.

List.solar presents a structured list of the largest solar power plants. The catalogue is grouped into categories according to type of a station (photovoltaic or concentrated solar thermal), location, and ...

The Global Solar Power Tracker is composed of worldwide facility-level data on utility-scale (1 MW+) solar photovoltaic (PV) and solar thermal facilities, as well as country-aggregated distributed (<1 ...

Area of €€ solar generators around the world

Find up-to-date statistics and facts on the global solar photovoltaic industry.
