In total, 27 projects - from 15 different companies - have been presented in the tender. The BESS capacity will be connected through different nodes overseen by utilities Edenor and Edesur.

Effective implementation of an EMS, particularly with a focus on battery energy storage, can transform how your business manages and utilises energy. It leads to increased ...

The projects are backed by 15-year, largely US dollar-linked contracts, ensuring a stable, long-term revenue stream and demonstrating the financial viability of combining solar with storage.

The Argentinean authorities plan to install the new storage capacity in critical nodes of the metropolitan area of Buenos Aires, with an estimated investment of \$500 million and an execution...

With an investment of USD 20 million, 15 MW of power, and a projected generation of 45 GWh per year--equivalent to the consumption of 11,500 households--this project will expand Central Puerto's ...

Will Argentina integrate new electricity storage infrastructure into urban distribution networks? This national and international open call, part of Resolution SE 67/2025, marks Argentina's first large ...

Why is EMS important in a solar project? EMS plays a critical role in ensuring safety in utility-scale solar projects: Risk Management: Monitors vital metrics, such as temperature and voltage, to detect ...

These projects will be installed in critical locations in the Buenos Aires metropolitan area, with planned investments exceeding USD 540 million (EUR 461.1m). Operations are expected to ...

The Argentina's ambitious push toward grid modernization through battery energy storage has received an enthusiastic response, with CAMMESA (Compañía Administradora del Mercado Mayorista ...

Argentina Solar Base Station EMS Project

This national and international open call, part of Resolution SE 67/2025, marks Argentina's first large-scale effort to integrate new electricity storage infrastructure into urban ...
