What is Belgium's largest battery energy storage system?

The first 400MWh phase of Belgium's Vilvoorde energy storage project successfully connected to grid, with total capacity of 200MW/800MWh, becoming mainland Europe's largest battery energy storage system.

Why is battery storage important for Belgium's energy transition?

Upon completion of the second 400MWh phase by the end of 2025, the entire installation will be providing clean, stable power for about 96,000 homes and helping stabilize Belgium's power grid. Battery storage is one of the most vital, yet too often overlooked, pieces of the energy transition jigsaw," said Moritz Rolf, Sungrow Europe Vice President.

Does Engie have energy storage projects in Belgium?

The company is also developing other energy storage projects in Belgium, including the 100MW/400MWh project in Kallo, which is currently under construction and scheduled for completion in 2027. This demonstrates Engie's long-term commitment to the Belgian and broader European energy storage market.
