In the energy self-sufficient village of Feldheim (Brandenburg), private local heating and electricity networks supply consumers and businesses directly with regional ...

A successful energy transition will require a variety of storage systems to absorb electricity during peak times and release it when needed -- for example in the evening and at night.

This Electricity Storage Strategy tabled by the Federal Ministry for Economic Affairs and Climate Action (the Ministry) wants to support the ramp-up of electricity storage and achieve the optimal systems ...

The BAM, the Helmholtz-Zentrum Berlin (HZB), and Humboldt University of Berlin (HU) have signed a memorandum of understanding (MoU) to establish the Berlin Battery Lab.

The new regulations are aimed at enabling a controlled, grid-supportive use of energy, especially at times of peak loads or oversupply, and reflect what has already partly been ...

Discover how Berlin's groundbreaking energy storage initiatives are reshaping renewable energy integration and creating new opportunities for global stakeholders.

Berlin has limited space for above-ground heat storage systems, which can also encounter hurdles in terms of building law and urban planning. Underground solutions such as aquifer heat storage are a ...

Germany is significantly simplifying the construction of large battery, heat, and hydrogen storage installations outside urban areas. The Bundestag has adopted an amendment classifying ...

The strategy paper provides an overview of the measures and challenges involved in establishing energy storage systems. The energy storage strategy aims to promote the expansion and integration ...

Berlin has high requirements for new energy storage

In the energy self-sufficient village of Feldheim (Brandenburg), private local heating and electricity networks supply consumers and businesses directly with regional energy from wind, biogas, and ...

Germany is preparing to ease planning rules for battery, heat, and hydrogen storage systems built outside urban zones.
