Why do RV circuit breakers trip?

Circuit breakers prevent your RV's electrical system from becoming overloaded and therefore, causing fire and electric shock. In other words, they act as a failsafe: they interrupt the power in case of an electrical surge. This is the main reason why they trip.

What are the different types of circuit breakers?

The industry currently offers a wide range of single- and double-pole circuit breakers to choose from. The former are probably the most popular ones. They are built to monitor the current of a single wire. Obviously, double-pole ones monitor the current of two wires and interrupt it simultaneously.

Who manufactures low voltage circuit breaker in China?

Founded in 2004, Shanghai DADA ELECTRIC Co., Ltd is acknowledged as one of the most respected nationwide manufacturers and exporters of low voltage CIRCUIT BREAKER in China. The Group, comprising 3 factories, owns a production area of 52,400m²; And employs more than 500 staff.

What is a tandem breaker?

There are also so-called tandem breakers that provide two separate electrical circuits in the space of a single-port variant. Unlike double-pole models, they don't disconnect two poles simultaneously. All the above-mentioned products from renowned brands such as Husky Towing, Parallax, and others are showcased on our digital shelves.
