How many energy storage facilities are there in Massachusetts?

The Massachusetts Energy Siting Facilities Board has approved two energy storage facilities with a combined capacity of 400 MW/800 MWh. This decision overturns previous rulings that hindered the development of these facilities. Once operational, they will fulfill 80% of the state's 1 GWh energy storage deployment target for 2025.

Could a \$1 billion battery farm power 500,000 homes in Everett?

This is a preliminary rendering of the project, as seen from Beacham Street. Rendering courtesy of Jupiter A \$1 billion-plus battery farm big enough to power 500,000 homes for four hours could start going up as soon as the end of next year in Everett, now that it's one of four winners in a state competition for energy storage contracts.

What is the largest lithium-ion battery farm in New England?

The 700-megawatt Trimount project from Jupiter Power would be the largest such lithium-ion battery farm in New England, if it opened today.

Why should we invest in energy storage technology?

Advancements in Energy Technology: This project represents a significant investment in cutting-edge energy storage technology. It could lead to advancements and cost reductions in battery technology, making energy storage more accessible and efficient for other regions and projects.

Flatiron Energy's groundbreaking 300-MW battery storage project in Boston aims to enhance reliability and champion environmental justice by 2028. Powering a greener future starts here!

DENVER& BOSTON---- Flatiron Energy announced today that it has closed on approximately \$540 million of financing commitments from leading financial institutions to support the ...

The facility is a significant milestone in the buildout supporting New England's energy infrastructure and grid reliability. In February 2021, Cranberry Point was one of the first battery ...

The 700-megawatt Trimount project from Jupiter Power would be the largest such lithium-ion battery farm in New England, if it opened today.

Boston s largest energy storage project settled

ISO New England has given the thumbs up to a project proposed by Flatiron Energy and envisaging the installation of a 300-MW/1,200-MWh battery energy storage system (BESS) in ...

Aside from standalone battery storage facilities, developers have begun implementing battery energy storage systems into their projects, including Dream Collaborative, which worked with ...

DENVER & BOSTON -- Flatiron Energy announced it has successfully closed on \$540 million in financing commitments to construct and operate the Taft Project, which will become the ...

Massachusetts' energy storage mandate requires investor-owned utilities to secure 5,000 megawatts (MW) of storage by 2030.

Flatiron Energy's groundbreaking 300-MW battery storage project in Boston aims to enhance reliability and champion environmental justice by 2028. Powering a greener future starts here!

The Commonwealth overruled the decisions of its own siting boards and one town's moratoria on all solar and storage projects, paving the way for the imminent construction of two ...
