notable recent development in Bulgaria is the registration of the first PV provider of balancing services by ESO, the national TSO.40 Plans are underway to register two more, demonstrating that flexibility ...

It is the tool for grid and microgrid operators in order to prevent congestion (voltage and current issues) and power quality problems with the increasing share of intermittent RES, giving special attention to ...

The hardware segment is expected to hold the largest share of the microgrid market from 2025 to 2030, driven by the critical role of physical infrastructure in enabling reliable and efficient microgrid operations.

When considering the Microgrid industry in Bulgaria, several key factors warrant attention. The regulatory environment plays a significant role, as the country is aligning its energy policies with EU ...

The webinar, which takes place on 15 May 2025 from 11:00 to 11:45 (CET), will offer insights into energy efficiency and grid resilience applied to a metro line in Bulgaria's capital, Sofia.

Bulgaria is just beginning its energy transition. Wind and solar are highly cost-effective and paving the path to accounting for a much bigger share of Bulgaria's electricity mix.

Invinity has delivered a 0.4 MWh VS3 vanadium flow battery system to a commercial customer in Sofia, Bulgaria for a solar + storage microgrid project which will provide 24/7 low-carbon power. Find out ...

In Bulgaria, the microgrid control system market encounters challenges related to technology integration and regulatory compliance. Implementing microgrid control systems requires integrating various ...

Integrated solar and storage systems are emerging as a key solution to address grid fluctuations and enhance the efficiency of renewable energy utilization. Known as the "Country of ...

The webinar provides information about the metro microgrid study conducted as part of the EU-funded

Bulgaria microgrid applications

TIGON project which has developed software and hardware components for the roll ...
