Can solar power fix Egypt's energy crisis?

Egypt's first large-scale hybrid solar and battery plant has begun construction as the country looks to its abundant sunshine to help fix its energy crisis. Obelisk, located in Nagaa Hammadi, will combine 1.1 gigawatts of solar production with 200 megawatt hours of battery storage.

Could Egypt's summer heat be a solar solution?

Whilst Egypt's summer heat increases its electricity demand, it could also offer a solution. The south of Egypt, where Scatec's new project is breaking ground is "in the magic solar belt," said Elgendy. According to the Global Solar Atlas, Egypt has the fourth-highest solar PV (photovoltaic) potential of any country.

Why is Egypt struggling to keep the lights on?

With an overreliance on gas, and with declining production from its flagship Zohr gas field, Egypt is struggling to keep the lights on. Egypt issued a tender to import nearly two million tons of fuel oil in May and June to meet its electricity needs as gas imports became too expensive.

Where does Egypt's electricity come from?

Around three quarters of Egypt's electricity comes from gas. But in recent years, as its domestic gas production fell, it became reliant on imports and rising gas prices plunged Egypt into a series of blackouts.

Egypt is intensifying its transition toward renewable energy, with solar power playing a pivotal role in the country's ambitious strategy to meet 42% of its electricity needs from green ...

This article will introduce you to the industry of solar energy in Egypt, including the development potential, current development policies and related projects.

Market Opportunities Large-scale solar projects: Egypt has a vast potential for large-scale solar projects, including utility-scale solar farms and solar parks. Expanding the country's solar ...

Egypt's first large-scale hybrid solar and battery plant has begun construction as the country looks to its abundant sunshine to help fix its energy crisis.

Egypt solar energy market valued at USD 3.6 billion, driven by government targets for 42% renewable share

Can Cairo's solar panels be right

by 2035, abundant resources, and declining solar tech costs.

Why Cairo Solar is Lighting Up Egypt's Renewable Energy Future Harnessing Sunshine in the Land of Pharaohs Let's face it - when you think about Cairo solar energy, your mind might jump to images of ...

03 Nov 2025 Massive solar panel production in Egypt with 90 percent local components is expected by Q1 2026 - "Massive solar panel production in Egypt with 90% local components is expected by Q1 ...

Egypt is turning to its vast solar potential to meet rising energy demands and curb its dependence on expensive natural gas imports. While regulatory challenges and market subsidies ...

After a hot summer plagued by power cuts and growing discontentment, the Egyptian government is investing on solar energy in a bid to transition away from its current overly gas ...

The Sahara's New Shiny Toy: Solar Farms camels walking past 500,000 solar panels in Egypt's Western Desert. That's the reality at the Benban Solar Park, Africa's largest photovoltaic installation. ...
