Is there any easy way to reduce the voltage to a safe level for use in my 12v rated inverter without having to open the front glass pane and rewiring the individual solar cells.

Canva is a free-to-use online graphic design tool. Use it to create social media posts, presentations, posters, videos, logos and more.

The short answer to this question is Yes, you can charge a 12v battery with an 18v solar panel. Here's how...

Your verbiage seems odd to me. Just to be clear- You have an 18V battery That is the power source for the inverter. The inverter is powering lighting. Is that correct? Check the inverter's incoming voltage ...

No. You need a solar charge controller to connect the panel to the battery, otherwise, the panel would potentially over-charge the batteries (though their BMS should protect them) and you ...
