The short answer is yes--solar panels can be mounted vertically. This setup is less common than traditional angled installations but is becoming more popular in specific scenarios.

Can Solar Panels Be Mounted vertically? - The Facts
Can Solar Panels Be Fitted to A Vertical Wall? How Effective Are Vertical Solar Panels? Can I Put Solar Panels on Side of House? Does The Orientation of A Solar Panel Matter? Should Solar Panels Be Landscape Or portrait? What Is The Best Way to Mount Solar Panels? Can Solar Panels Be Mounted Vertically Conclusion
Yes, solar panels can be fitted to a vertical wall. These panels are usually installed flat onto the roof of a building, but there are various ways that they can also be attached vertically. This reduces installation costs and simplifies installation by eliminating the need for additional grounding hardware. The direction of sunlight will depend on... See more on solar comparison
