Each Solar Safe Scrape™ replacement blade turns your tool into a plastic razor scraper suitable for quickly scraping lichen and organic growth from solar panels, without the danger of scratching the ...

Normally used to scrape off drywall texture or paint... is an "one sided thick razor blade that fits in an extendible round handle. Ice will dull the blade over time.

You've probably seen the clips claiming you can generate free electricity from trash--but does it actually work? We're putting it to the test!

Disassembling solar panels and photovoltaic modules involves removing various interconnected components safely and methodically. This intricate process demands a thorough ...

They probably don't. There's a lot of people out there who make videos of things that don't work. The videos are nothing more than click bait so that the video creator earns advertising ...

If you only have razor blades, they can be used, but it will take longer and the blades need to be replaced very often, as they will dull quickly. Unlike glass, solar cells are crystalline, rather than ...

If these are amorphous bendy plastic modules, you will have to be much more careful with either technique, or any mechanical means like razor blades and such, but it wouldn't kill you to ...

Background Are Solar Panels Hazardous Waste? Overview of Hazardous Waste Regulations State Solar Panel End-Of Life Policies Additional Resources Hazardous waste testing on solar panels in the marketplace has indicated that different varieties of solar panels have different metals present in the semiconductor and solder. Some of these metals, like lead and cadmium, are harmful to human health and the environment at high levels. If these metals are present in high enough quantities in the sol...
