OverviewHistorySolar resourcesSolar photovoltaicsConcentrated solar powerSolar water heatingEffects on the global solar power industryGovernment incentivesChina is the largest market in the world for both photovoltaics (PV) and solar thermal energy. Its PV capacity crossed 1,000 gigawatt (one terawatt, 1 TW) in May 2025. By June 2025, China's PV capacity surpassed 1,100 gigawatt. In 2024, China added 277 gigawatts (GW) of solar power, which was equivalent to 15% of the world's total cumulative installed solar capacity.

In this article, we will explore the key manufacturing hubs that fuel China's solar industry, highlight the top 11 solar panel manufacturers in China, and provide an overview of the major trade fairs that are ...

Discover where solar panels are manufactured globally. China leads with 77.8% production, but learn about quality, ethics, and alternatives in our comprehensive 2025 guide.

Solar power in China China's solar potential Wind and solar surpassed a quarter of China's electricity generation for the first time in April 2025.

China alone produces at least 80 % of the main components of PVs. Also, more than 30 % of the cumulative installed capacity is in China, the top exporter of manufactured solar PVs in the ...

The United States put tariffs on Chinese solar products and banned goods linked to China's Xinjiang region over concerns about forced labor to try to develop a domestic solar ...

China produces practically all of the world's equipment for making solar panels, and almost all of the supply of every component of solar panels, from wafers to special glass.

So there is a lot of uncertainty in the Chinese solar industry, but there are also irrefutable facts: China needs to continue to expand domestic solar capacity to reach its climate...

China s domestically produced solar panels

For several years, the Chinese companies have been dominating the manufacturing and supply of solar panels with only 1 or 2 maximum of non-Chinese companies make it to the list of 10 ...

Even the equipment to manufacture solar panels is made almost entirely in China. The country's solar panel exports, measured by how much power they can produce, jumped another 10...

The continent imported 60% more solar panels from China over the past year, though a lack of reliable installation data makes it a challenge to track the true pace of deployment.
