How much does a 100kW Solar System cost?

On average, the cost of a 100kW commercial solar system in the U.S. ranges from \$150,000 to \$250,000. This price includes the cost of the solar panels, inverters, racking, installation, and other necessary components. Below is an approximate range of costs for a 100kW system in different U.S. states.

Is a 100kW Solar System a good choice?

A 100kW system generates far more electricity than most homes need, and is not suitable for residential use. If a 100kW system is beyond your needs, you can also consider a 5kW to 15kW system, which can meet the energy usage of a typical home. You can take a look at our 5kw and 10kw solar systems.

Should you invest in a 100kW Solar System?

Investing in a 100kW solar system can be highly beneficial, especially if you live in an area with decent sun exposure. With the potential to generate \$31,025 worth of electricity annually, you can expect a 20% return on your investment based on the current costs of solar panels (\$200,000 for the system).

How much does a solar system cost?

Based on current electricity costs, you can expect a 20% return on investment per year on your solar panels. The typical cost for a 100kW solar system is approximately \$200,000. However, it's important to note that prices for solar systems have come down substantially over the past 10 years. Source: The National Renewable Energy Laboratory (NREL)
