What kind of power does Cuba use?

Cuba uses BOTH a 110 and a 220V supply voltage with a 60Hz frequency. Although most hotels in Cuba use 110V power, some of the newer hotels use 220V. The same is true in casa particulars. So bring your regular phone or laptop charger, hairdryer, or shaver to Cuba and charge them from a hotel or a casa particular wall socket.

What voltage is used in Cuba?

The standard voltage and frequency in Cuba are 110V and 220 V and 60 Hz, respectively. So keep your eyes open! Yes, that's right, in Cuba, two different voltages (110 and 220 V) are used. The voltage you will encounter will vary depending on the region, city, and even the casa particular and hotel.

Do I need a power adapter in Cuba?

If you are visiting Cuba from the United States, you should bring a power adapter because US Type A or B outlets may not be readily available. If your device runs on 110 volts or is dual voltage, and the plug fits in a Cuban power outlet, it will work without a plug adapter in Cuba.

What is a plug adapter for Cuba?

Please note that a plug adapter for Cuba (also known as a power adapter) is designed to change the shape of the plug on your device so that it can fit into a plug outlet in Cuba, but it will not change the voltage from 110 volts to another voltage.
