---

The global wind market outside of China and the US demonstrates stability, with onshore wind keeping steady growth whilst persistent headwinds undermine offshore development.

The Global Wind Energy Council (GWEC) has released its latest Global Wind Report, revealing that 2024 marked a record year with 117 GW of new wind energy capacity installed ...

Find up-to-date statistics and facts on the global wind power market.

The world's installed wind power capacity now meets well over 10% of global electricity demand - and much more than nuclear power. More than 30 countries now have a share of wind ...

GWEC release the latest data on global markets for wind, country profiles, market analysis, and more.

Major developments across Asia, Europe, and North America, combined with increasing investment in offshore wind, especially in Europe, will enhance the industry. As per WWEA 2024 assessment, the ...

This article explores the latest advancements, market trends, and challenges in wind energy technology, supported by real-world data and projections for 2023-2030. Discover how innovations in turbine ...

To further stimulate supply chain investment and meet ambitious net zero targets, the wind industry must leverage regional strengths, de-risk investments, simplify regulations, standardise processes ...

The Asia-Pacific region remains at the forefront, with China accounting for 70% of global installations. Europe holds its position as the second-largest wind market, adding 16.4 GW of new capacity -- 12.9 ...

The Global Wind Power Tracker (GWPT) is a worldwide dataset of utility-scale, on and offshore wind facilities. It includes wind farm phases with capacities of 10 megawatts (MW) or more.
