Who controls the distribution of electric power in Buenos Aires?

The distribution of electric power in the City of Buenos Aires and in Greater Buenos Aires falls under Edenor and Edesur, who have signed a concession contract with the national government given the inter-jurisdictional nature of the service. The national government rules on their regime tariff and controls the service. Provincial Government

How is electricity distributed in Argentina?

Provincial Government The distribution of electric power in the rest of Argentina is carried out by the provincial distributors, which do not perform an inter-jurisdictional service and do not sign a concession contract. Provincial governments rule on their regime tariff and control the service.

Can Argentina become a leader in next-generation nuclear technology?

By capitalising on the global shift towards AI and the corresponding energy demands, Argentina can establish itself as a leader in next-generation nuclear technology. This approach not only addresses the immediate energy needs of AI infrastructure but also fosters long-term economic growth through technology exports and enhanced energy security.

Are there foreign investment restrictions in the Argentine power industry?

In addition, there are several distribution companies that operate locally at a provincial level. There are no foreign investment restrictions or protections in the Argentine power industry, except in the case of construction of new facilities by government-owned companies, for which the supply of local goods may be applicable.
