In the 19th century, it was observed that the sunlight striking certain materials generates detectable electric current - the photoelectric effect. This discovery laid the foundation for solar cells. Solar cells ...

Some of the earliest uses of solar technology were actually in outer space, where solar was used to power satellites. In 1958, the Vanguard I satellite used a tiny one-watt panel to power its ...

Explore the history of solar panels from their early beginnings to today's high-efficiency innovations. Discover how design, efficiency, and affordability have transformed solar energy into a ...

Discover the fascinating 180-year history of solar panel invention and the broader history of solar energy, from Edmond Becquerel's 1839 discovery to Bell Labs' breakthrough and today's ...

Modern solar panels trace their origins to the 19th century, with the discovery of the photovoltaic effect by Alexandre-Edmond Becquerel and the development of silicon solar cells by Bell Labs in the 1950s.

At the International Space Station, astronauts begin installing solar panels on what will be the largest solar power array deployed in space. Each "wing" of the array consists of 32,800 solar cells.

Charles Fritts installed the first solar panels on New York City rooftop in 1884. Courtesy of John Perlin. Take a light step back to 1883 when New York inventor Charles Fritts created the first...

This new solar cell was publicly demonstrated on April 25, 1954. This development is a landmark in the history of solar energy, widely considered the birth of the modern solar panel and ...

Here is an overview of some of the key developments in bringing solar panels from an early concept to a strong replacement for nonrenewable energy that gains global popularity every year.

In 1767, Swiss scientist Horace de Saussure created the first solar collector--a series of glass boxes nested

Early solar panels

inside one another. When exposed to sunlight, the innermost box could reach ...

Some of the earliest uses of solar technology were actually in ...
