Construction of China's largest offshore solar farm officially commenced at Haibin harbor in Lianyungang city, East China's Jiangsu Province on Sunday, China National Nuclear Corp (CNNC)...

The largest of its kind in China, the energy farm is officially known as the Rudong offshore photovoltaic-hydrogen energy storage project.

(ECNS) -- China's first offshore photovoltaic (PV) power-generation farm built in the sea off Dongshan County with high wind speeds started supplying electricity to the grid in Zhangzhou City,...

China has achieved a milestone in renewable energy with the connection of its first 1-gigawatt offshore photovoltaic (PV) project to the power grid. This development signals a significant...

The first phase of an offshore photovoltaic (PV) power-generation platform built in the sea off Dongshan county, East China's Fujian province, started supplying electricity to the grid on Friday.

A solar power project in the Gobi Desert has moved the needle on the size and scope of global photovoltaic installations, aided by innovation in equipment and construction.

CHN Energy's 1-gigawatt offshore photovoltaic (PV) project in Kenli District, east China's Shandong Province, successfully connected its first batch of PV units to the grid on Wednesday.

Located 8 km offshore the city of Dongying, the solar farm covers some 1,223 hectares and comprises 2,934 solar PV panels installed using large-scale steel truss platform, fixed-pile ...

However, China still needs to turn the massive renewables buildup into power generation, replace fossil fuels, and reach the "tipping point" so as to peak its carbon emissions as early as ...
