In the future, only electric vehicles owned by Tallinn residents will be able to park for free in the capital under new plans proposed by the city government. Deputy Mayor Kristjan J&#228;rvan ...

Electrification of the transportation sector is an important strategy in Estonia, as the country needs to honor its international climate commitments.

The table highlights current as well as announced key policies and measures that support the deployment of electric vehicles (EVs) and zero-emission vehicles (ZEVs) by region and country.

For example, Tallinn, the capital city, provides free parking permits for electric vehicles. In some areas, electric vehicles are allowed to use bus lanes, which can significantly reduce travel time during peak ...

A comprehensive upgrade of the electric vehicle (EV) charging area at Tallinn Airport's multi-storey car park has been completed. In cooperation with Alexela, modern EV chargers have ...

Under the new plan, only electric car owners or responsible users registered as Tallinn residents in the Population Register would be eligible for free parking. The new rule, which requires approval by the ...

As of July 2022, the Estonian government offers subsidies of up to EUR5,000 for electric car purchases. [3] As of October 2022, there were about 400 public charging stations in Estonia. [1] Starting in 2025, all ...

The directive stipulates that 31% of the busses procured in Estonia by 2025 and 43% by 2030 must be clean vehicles (i.e. gas buses), while 50% of these must have zero emissions (electric busses).

up to 5-year-old electric vehicles with this measure. This measure has proven to be popular and shows that demand-side incentives for electric vehicle purchases, such as support measures, tax ...

At its Thursday session, the Tallinn city government approved new rules for the use of rentable light vehicles,

mini-mopeds and bicycles in urban space. The regulations cover vehicle ...
