Why did Gambia not import energy?

In countries that export large amounts of energy, falling energy prices can also cause major economic shocks. Gambia did not import energy. Energy sources, particularly fossil fuels, are often transformed into more useful or practical forms before being used.

How many people in Gambia do not have electricity?

In Gambia, 55% of the overall population does not have access to electricity and only 10% have access to clean cooking facilities.

What are the different types of energy transformation in Gambia?

One of the most important types of transformation for the energy system is the refining of crude oil into oil products, such as the fuels that power automobiles, ships and planes. No data for Gambia for 2021. Another important form of transformation is the generation of electricity.

How much electricity will Gambia generate in 2025?

The Gambia's Electricity Sector Roadmap (2019-2025) aims to scale up electricity generation to 200 MW of available capacity at peak in 2025, with 14 MW expected from the OMVG project with Guinea and Senegal, and 50 MW from the Souapiti project and the remainder through Independent Power Producers (IPP).
