-----

Fluence has a strong track record in Australia, with four battery energy storage systems currently in operation, another two entering operations in the next few months, and several BESS ...

The Wellington Battery Energy Storage System (BESS) will store excess renewable energy ready for use by homes and businesses during peak times. BESS projects play an important role in the future ...

In conclusion, as Fluence embarks on this landmark project with AMPYR Australia, it not only sets a precedent for future battery storage initiatives but also demonstrates the potential for ...

The Wellington Energy Storage Project Cooperation isn't just another battery farm - it's a game-changer for New Zealand's energy transition. Think of it as the 'Swiss Army knife' of power ...

Wellington A-CAES will allow New South Wales' attractive and growing solar and wind resources to be directly converted into reliable, on-demand electricity for the greater region and the broader NSW ...

The project incorporates a large-scale battery energy storage system (BESS) with a discharge capacity of 500 megawatts (MW) and a storage capacity of 1,000 megawatt hours (MWh), along with ...

In operation, the project will be one of the largest battery storage projects in NSW and will contribute to the overall storage capacity and reliability of the National Electricity Market (NEM).

You know, Wellington isn't just famous for its coastal winds anymore. Since early 2024, the city's been pioneering a shared energy storage model that's redefining how communities interact with renewable ...

Focusing initially on both the redox flow batteries and supercapacitors technologies, Allegro Energy is the latest venture built off Wellington UniVentures' technology, providing clean and ...
