Definition of flexible adjective from the Oxford Advanced Learner's Dictionary. (approving) able to change to suit new conditions or situations. Our plans need to be flexible enough to cater for the ...

Taking a flexible PV bracket with a span of 30 m and a cable axial force of 75 kN as the research object, we investigate the variation patterns of the support cables and wind ...

Flexible, limber, pliant refer to that which bends easily. Flexible refers to that which is capable of being bent and adds sometimes the idea of compressibility or expansibility: a flexible piece of rubber hose.

Capable of being shaped, bent, or drawn out, as by hammering or pressure: ductile, flexible, flexuous, malleable, moldable, plastic, pliable, pliant, supple, workable.

Due to the adoption of various specifications, the aluminum alloy pv bracket can not only be freely chosen by the vast number of users, but also meet the needs of different countries and regions with ...

Development of large-scale, reliable and cost-effective photovoltaic (PV) power systems is critical for achieving a sustainable energy future, as the Sun is the largest source of ...

The utility model aims to provide a flexible photovoltaic bracket and aims to solve the problem that in the prior art, a photovoltaic plate on a guy cable cannot be subjected to angle...

Whether you're a solar newbie or a seasoned installer looking to upskill, this photovoltaic bracket drawing course explanation will light up your technical know-how like a perfectly angled solar array.

flexible applies to something which may or may not be resilient or elastic but which can be bent or folded without breaking.

Flexible photovoltaic bracket drawing explanation

FLEXIBLE definition: 1. able to change or be changed easily according to the situation: 2. able to bend or to be bent.... Learn more.

When designing flexible photovoltaic supports, the requirements of structural stability, weather resistance, lightweight and strength must be comprehensively considered to ensure the long ...

Definition: Flexible photovoltaic brackets use prestressed flexible cable structures (such as prestressed steel strands) as the main force-bearing components to form a large-span photovoltaic ...

In view of the uniqueness of its structure, the flexible bracket has a wide range of application scenarios, similar to sewage treatment plants, agricultural light complementarity, fishing light complementarity, ...

flexible: Capable of being bent or flexed; pliable.

The bracket has a flexible elevation that allows different angles of inclination. Due to the variable inclination to the sun, optimal energy yields can be achieved.

The Custom Flexible Solar Panel Mounts are a set of brackets that attaches your solar panel to the roof of your vehicle or camper. The Mount system is an aerodynamic, low profile track that ...
