Energy prices in France turned negative following a surge ...

Energy prices in France turned negative following a surge in renewable output last week, causing a number of nuclear reactors to shut down in response. As Bloomberg reports, consumption ...

The rise in clean energy supplies came despite year-over-year drops in wind and hydro power production, which were offset by record solar generation and the highest nuclear power output ...

Sunny and blustery weather has driven up solar and wind generation, prompting the grid operator to request that Electricite de France SA take several nuclear plants offline.

French power prices again tumbled below zero as solar energy swamped the grid, forcing the country's vast nuclear fleet to slash output.

The National Assembly's vote Tuesday is a relief for renewable-energy developers and President Emmanuel Macron, who aims to fight global warming and reduce France's reliance on ...

(Montel) French solar and wind farms curtailed a record 1.7 TWh of power output last year as the number of hourly negative spot prices more than doubled, TSO RTE said.

Clement Bouilloux, Market Expert at Montel, discusses how France's power system is struggling with overproduction and negative prices thanks to its generation mix.

Discover why France wasted 10% of its solar and wind energy in 2025 and explore the challenges of integrating renewable energy into the grid. Learn about the impact of nuclear power ...

Les panneaux photovoltaïques sont collectés dans des points d'apport volontaire. Quatre sites de recyclage existent en France : près de Bordeaux, Lille, Toulouse et Grenoble. Selon Nicolas ...

France dismantles solar power

The rapid growth of wind and solar power, with demand not keeping pace, has created numerous challenges for managing the electricity grid, the nuclear fleet and public finances.
