The Georgia Secretary of State registers voters, tracks annual corporate filings, grants professional licenses, and oversees the state's securities market.

Project Summary: This project is developing an integrated system of modular power electronics devices that connect utility-scale solar power plants and energy storage with the high voltage direct current and ...

Georgia Power is enhancing grid reliability and sustainability through Battery Energy Storage Systems (BESS), supporting clean, safe, and affordable energy for 2.8 million customers while integrating ...

Christopher Nunn was appointed Commissioner of the Georgia Department of Community Affairs (DCA) in 2017. He leads the State's community development efforts to support local leaders in ...

Apply for a Georgia Driver's License (Class C) Georgians who are 18 and older may apply for a non-commercial driver's license (Class C).

How can we help? We are here to connect you to information and answer questions about Georgia state government.

Abstract The successful integration of battery energy storage systems (BESSs) is crucial for enhancing the resilience and performance of microgrids (MGs) and power systems. This study introduces a ...

Optimized for Installers, Distributors & ESS Professionals As residential, commercial, and microgrid energy storage rapidly expands, one factor determines project performance more than any individual product: ...

NLR is developing grid-forming controls for distributed inverters to enable reliable control of low-inertia power systems with large numbers of inverter-based resources.

A common configuration is to couple the energy storage and solar at the AC side, but hardware is becoming increasingly available that couple these resources on a shared DC-Bus or input bay on the inverter.

How-To Guides Our guides take you step-by-step through common processes in Georgia.
