In this article, we explore how utilities and developers are approaching the planning, deployment, and integration of grid-level storage systems--and what makes these investments ...

Quidnet Energy, ENBW, and Peak Energy have energy storage projects in the works in the U.S. and Europe. A Texas startup has completed a key test for its long-duration geomechanical ...

SHANGHAI, June 21 (Xinhua) -- U.S. carmaker Tesla on Friday inked a deal with Chinese partners to build a grid-side energy storage station in Shanghai using its Megapack energy-storage batteries.

Upon completion, the project will enhance Shanghai's new energy consumption capacity by participating in power grid peak shaving and frequency regulation, as well as spot cargo power ...

Georgia Power announced today that it has started construction on a new 200-megawatt (MW) battery energy storage system (BESS) in Twiggs County, southeast of Macon, Ga.

Of the 1,643 operational energy storage projects worldwide, 49% are located in the U.S., with another 131 projects under construction. 10 California leads U.S. capacity with 15.5 GW, followed by Texas. 8

PORTLAND, Ore. - October 17, 2024 - GridStor, a developer and operator of utility-scale battery energy storage systems, announced today that construction is underway for its 220 MW, 440 MWh battery ...

In early June, Greentown Company, a subsidiary of Lin-gang Group, announced the construction of Shanghai's first large-scale industrial and commercial solar-plus-storage microgrid ...

The project will be delivered in stages, with initial construction expected to begin in late 2026 and full buildout of solar and battery facilities planned for 2027 and 2028. Officials at ...

Grid energy storage system starts construction

US energy storage developer Gridstor has announced the start of construction of its first project, a 60MW/160MWh battery energy storage system (BESS) in California.
