We used the distributed Nautilus vertical axis wind power generation system as the main output of the system, and it used the photovoltaic and hydrogen energy storage systems as alternative energy sources.

Constructed on land leased from the Taiwan government, this floating solar project not only expands the nation's renewable energy infrastructure but also strengthens Taiwan's position on the ...

Recharge Power Co., Ltd., a subsidiary of J& V Energy Technology Co., Ltd., has been awarded the EPC contract for a large-scale solar-plus-storage project from HEXA Renewables, with a total ...

To support government policies promoting aquaculture-solar and agri-solar models, HEXA Renewables Taiwan is expanding projects in counties including Changhua, Yunlin, Chiayi, and Tainan, with flexible deployments on ...

HEXA's project supports Taiwan's ambitious energy targets--20 GW of renewable capacity by 2025 and net-zero emissions by 2050. The plant offsets 136,000 tons of CO2 emissions each year, providing ...

This groundbreaking installation, led by Hexa Renewables, a Taipei-based firm, is set to provide clean energy to approximately 74,000 households, marking a pivotal shift towards sustainable energy solutions.

Beyond its impressive scale, HEXA's floating solar project marks a significant contribution toward Taiwan's decarbonisation targets, which include achieving 20 GW of renewable energy capacity...

HEXA Renewables has successfully launched the world's largest offshore floating solar power plant in Changhua County, Taiwan. This is considered to be a significant milestone in renewable energy development. This ...

Hexa Renewables has commissioned the world's largest offshore floating solar plant in Taiwan, providing power to 74,000 households.

Hexu Solar Power Generation

We are excited to announce that HEXA Renewables, backed by global infrastructure fund I Squared Capital, has teamed up with the Taiwanese government and completed the commissioning of the ...
