As Central America accelerates its transition to sustainable energy, the Honduras San Pedro Sula Energy Storage Phase II Project stands as a pivotal initiative. This article explores the project's ...

The US\$50mn battery energy storage system will boost Honduras' grid.

Six separate companies have submitted bids to build the 4-hour BESS project, and it will be implemented next year after evaluation and award phases are completed, Carbajal said. The ...

The National Electric Power Company (ENEE) has selected a Chinese-Honduran consortium to design, supply, install, test, and commission a grid-connected battery energy storage ...

The project, a national key initiative of Honduras, will significantly enhance the stability of Honduras' power grid and its capacity to integrate renewable energy upon completion, contributing to ...

In November 2024, Honduras made waves with its 75MW/300MWh battery storage tender - the energy equivalent of building a 4-hour power bank for 75,000 Honduran households [1].

Discover how Honduras is advancing renewable energy integration through innovative storage solutions. This analysis ranks major projects and explores their impact on Central America's power grid stability.

This project, selected through an international tender with six proposals, will be the largest energy storage system in Central America once operational by the end of 2025.

A contract worth \$50.2 million has been awarded to the Chinese-Honduran consortium Windeny-Equinsa for the construction of a 75 MWh energy storage system.

Windey, in partnership with Honduran energy company EQUINSA, has signed a major EPC contract for a 75MW/300MWh energy storage project in Honduras.
