Do hotels use solar energy?

Many modern hotels and resorts worldwide use solar power as their primary or secondary energy source. Hotel owners are taking a leap in sustainability by adopting solar energy to power their premises. These hoteliers have realized the environmental benefits and energy savings of harnessing energy from the sun.

Why are hotel owners switching to solar energy?

With trends in environmental consciousness, hotel owners are shifting to solar energy systems to power their facilities. And this opens doors for numerous benefits like cost savings on electricity, improved customer experiences, and enhanced brand image. The hospitality industry is one of the sectors with the highest energy demand.

How is solar energy used in the hospitality industry?

Solar energy, obtained from the sun's radiation, is converted into usable energy through various methods such as photovoltaics and solar thermal technologies. The hospitality industry encompasses a wide range of sectors, including hotels, resorts, restaurants, and event venues, which provide accommodation, food, and entertainment services.

Which Marriot Hotels use solar energy?

Courtyard by Marriot-Lancaster is also the first Marriot-branded hotel in the U.S. to meet all its energy requirements from solar power. Waianuhea Eco Resort - As the name suggests, Waianuhea B&B is an eco-friendly facility in Honokaa, Hawaii. This remote, off-grid 4-star facility generates all its energy from a solar P.V. (photovoltaic) system.
