Spent some time researching this forum for answers but decided to post for a more specific response from all of you in the know. I am in the early stages of planning a DIY off grid solar ...

What I would do, knowing what I know now, is if you're looking at buying a particular inverter, Google the shit out of it, and previous models looking for owner reports of failures, repair videos, etc. Check ...

Questions and comments about the best performance, best quality and best value solar inverters.

When choosing the best inverter for solar, there are three main types to consider: string inverters, microinverters, and power optimizers. Each type has its pros and cons, and the best choice depends ...

Due to pricing, I personally chose the NHX-12K inverter which is a very comparable inverter from watts247 , the US distributor for them. The NHX inverter pretty much offers me the ...

What I would do, knowing what I know now, is if you're looking at buying a ...

There are some threads about the SAJ battery and alternatives. They are more of a budget brand but have been around for I guess ten years in the inverter market so are not unheard of.

Up in smoke... learn from my mistake! Did your experimental battery or home built inverter experience a rapid, unplanned disassembly? Reverse polarity a \$3K inverter, and see it go ...

We switched from SolarEdge to Enphase about 2.5 years ago due to massive failures of their inverters. No real complaints about the optimizers, but the inverters had about a 20% failure rate for us, and ...

Read on to discover all the different types of solar inverters and learn how to make the right choice. Solar inverters convert the DC current generated by your photovoltaic system into AC ...

I don't understand the question. Whichever the brand is, it's an inverter, the power comes from the sun, how can it not be clean? Or is there something else that you meant?

Based on performance, quality, service and value, from your experience installing solar, what are the best inverters on the market today?

I've owned a Solar Edge system (8kW) for 8 years, and I'm currently on my third inverter. The current one has been functioning well for the last year, but I had various issues with the first two.
