With this shipment, Huasun has now supplied its cutting-edge modules to the two largest single-site heterojunction solar projects in the world. As the largest HJT manufacturer, the company has...

Located on the edge of the Taklamakan Desert, the project combines renewable energy generation with ecological restoration, employing elevated panels at a height of 3 meters to improve soil moisture ...

This ambitious initiative includes 1,280 solar power generation arrays and four 220kV substations--the largest of their kind in China. This project is designed to deliver robust renewable energy to ...

Huasun's Himalaya G12-132 HJT modules bring advanced features to the project, including non-destructive cutting and light conversion film encapsulation, boosting power generation efficiency...

With a foundation built on science, speed, and sustainability, Huasun remains at the forefront of solar innovation--delivering accessible, high-performance solutions to power a cleaner world.

The company's products now power solar projects in more than 60 countries and regions across Europe, Asia, and beyond, advancing the global transition to a sustainable, low-carbon future.

Huasun Energy has achieved a significant milestone in its path to bring heterojunction (HJT) solar modules to the mainstream in utility-scale photovoltaic plants.

Known for its exceptional achievements in the heterojunction (HJT) photovoltaic sector, Huasun secured 7th place overall, making it one of the two most valuable companies in the solar energy field.

Together we will bring higher efficiency solar panel, which we will use massive production to bring the total cost down for HJT products and equipment and material.
