High-temperature lubricant for long-life lubrication of roller bearings at high temperatures, high loads, and speeds e.g. in generator bearings of wind turbines

Harnex 320, a wholly synthetic oil developed by Petro-Canada for use in wind turbine gearboxes, is designed to endure the harsh circumstances that wind turbines may face, such as severe ...

That's why we offer special oils and greases made just for wind turbines. Our products help reduce breakdowns, make parts last longer, and cut down on maintenance. With smart tools to track oil ...

There's a reason so many companies trust Mobil industrial lubricants to keep their wind turbines spinning. We deliver optimum equipment protection and oil performance in a wide range of ...

Designed for turbines with higher specific load requirements. Developed with leading manufacturers and certified by major wind turbine OEMs. Consolidate your lubricant inventory and cover both generator ...

Wind turbines are complex machines, and understanding their maintenance needs is crucial for optimal performance. This guide dives deep into wind turbine oil, addressing a vital ...

Understanding the different types of lubricants used in wind turbines helps you learn more about the conditions under which these machines operate. The right lubricant can extend the ...

Enhance wind turbine operations with the right industrial lubricants. Our guide on specially designed lubricants for wind turbine applications.

Next generation wind power requires equally innovative lubricants designed to maximise wind turbine performance and increase uptime. Shell's hydraulic oils are designed to help you increase efficiency ...
