Launched in 1978, the Three-North program spans 13 provincial regions, with Inner Mongolia a major battleground. It aims to improve the environmental conditions in northern China and prevent the ...

To date, photovoltaic bases have been established in the northern part of Kubuqi Desert, which also serve as solid booster for local ecological rehabilitation and economic growth.

Workers install photovoltaic panels at a photovoltaic project in Kubuqi Desert, north China's Inner Mongolia Autonomous Region, June 6, 2025.

Workers from CHN Energy Inner Mongolia Company dedicated their time and effort to transform the desolate landscape into a remarkable "blue ocean" of photovoltaic panels. After more ...

Driven by China's dual priorities of environmental rehabilitation and renewable energy development, Inner Mongolia has become a national model for combining photovoltaic (PV) ...

A recent empirical project led by Inner Mongolia Energy Group in China has demonstrated remarkable results in a photovoltaic (PV) desert control project.

An aerial drone photo taken on Sept. 2, 2025 shows workers installing photovoltaic panels at a new energy base in Kubuqi Desert, north China's Inner Mongolia Autonomous Region.

One of the state-approved large-scale new energy bases, the project in Ordos city of Inner Mongolia will include 8 gigawatts (GW) of solar power installations, 4 GW of wind ...

Here, solar photovoltaic (PV) panels were installed several meters above the water, helping to generate an annual 260 gigawatts-hours of energy -- enough to power ...
