What are the requirements for MV station installation & operation?

All installations and operations on the MV Station must be in full accordance with the national and local regulations and standards. Ensure that the installation environment (such as voltage, temperature, humidity, altitude, pollution level, water-proof and dust-proof level) is within the scope of equipment specifications. 5

How to hoist MV station?

Do not drag or drop the MV Station on any surface. oKeep the container stable and horizontal during hoisting, and ensure that the diagonal gradient of the container is within 5 degrees. o When the MV Station has been hoisted for about 300mm away from the ground, stop to check if all the connections are still firm.

How deep should a MV station foundation be?

o The foundation should be at least 100mm higher than the pea gravel ground on site to prevent the rain from damaging the base or penetrating into the MV Station. o Sufficient cross-sectional area and depth of the foundation should be maintained. The depth is designed according to local soil conditions.
