Since 2020, Ireland has made impressive strides by connecting over one gigawatt (GW) of energy storage capacity to its electricity grid - a significant milestone on its path to generating 80% ...

In June 2022, RWE assumed full operation of the Lisdrumdoagh Energy Storage Facility. With a capacity of 60 megawatts and 34 megawatt hours (MWh), this facility can feed electricity into the grid ...

Statkraft announces it will build Ireland's first four-hour grid-scale battery energy storage system (BESS) in Co. Offaly, co-located with Cushaling Wind Farm. Battery storage technology can ...

Wind and solar energy play a key role in Ireland's transition from fossil-fuel-based electricity generation. But these precious resources will need to be stored for times when the wind...

Scale of Ireland's energy storage opportunity Currently, the island of Ireland has about 1.2 GW operational energy storage capacity, including 965 MW provided by battery energy storage systems ...

Eir Solus develops stand-alone battery storage systems as well as hybrid energy systems that link battery storage with wind and/or solar plants. Batteries are an important building block of the energy ...

We continue our Spotlight Series with a focus on Ireland, where battery storage to support high levels of wind generation was once flourishing, but the route to market is now newly challenging.

Renewable energy company Statkraft has said it intends to build a grid-scale battery energy storage system at its Cushaling Wind Farm in Co Offaly. The battery-based energy storage ...

Construction is underway by Statkraft at Ireland's first 4-hour grid-scale battery energy storage system (BESS) in County Offaly, in Ireland's midlands. The 20MW, 4-hour BESS solution is ...

Ireland Mobile Energy Storage Site Wind Power Construction

We commissioned our first battery energy storage system at our Aghada generating site in Co Cork in 2022, capable of generating 19MW. We added a second battery on the same site in 2024 with an ...
