-----  
How do solar panel installers get paid?

The average wage for solar panel installers who work for companies is usually paid in one of two ways. Either hourly or daily rates are common. It usually depends on how your employer likes to do it. These rates are based on an eight-hour day. Being paid hourly or daily will vary.

How much does solar energy cost?

When the customer signs up for solar energy with any company, they usually pay for the installation of the solar panels, connecting it to the property as well as the solar panels themselves. All of this combined can cost anywhere between 15,000 to 50,000 dollars depending on how big the property is.

How do solar companies make money?

The primary and the most obvious way of making money as a solar company is by installing solar panels. The profit margin is quite low but it does exist, which is enough to keep the company afloat. Since the solar company recognizes that this is their primary earning, they focus more on making a strong connection with the clients.

Do prevailing wage requirements apply to solar panels?

No, prevailing wage requirements only apply to solar panel installations funded by federal agencies or subject to specific state or local laws. Private solar panel installations for homes or businesses typically don't fall under prevailing wage regulations.
