I'm thinking of adding a 4 AWG wire to the cabin of my wife's SUV from the battery so as to be able to use a 750 watt inverter to its max*. In researching this I came across people installing amps ...

If the neutral wire carries current, why do many people believe that it's safe? Ironically the neutral wire has the most potential* to be unsafe when it is NOT carrying current (that is, when there is a break).

No, the neutral wire should not be used as a live wire. Doing so can create safety hazards and damage electrical appliances. Is it safe to work with neutral wires? While neutral wires are generally safer ...

In this case, you should isolate the ground and neutral buses, which are located inside the modules, from each other. But you must bond the neutral bus and ground bus in the system cabinet together and connect them ...

Properly grounded neutral wires help minimise the risk of electrical shocks and short circuits. What happens if you don't have a neutral wire? Without a neutral wire, electrical devices might not work correctly or could even ...

This shared setup can lead to surprising situations where a neutral wire is unexpectedly carrying current. When working in these environments, it's vital to turn off all the circuits sharing the neutral to ensure ...

The neutral wire plays a vital role in preventing electrical shocks and fires by providing a safe return path for the current. When the neutral wire is disconnected or damaged, it can lead to dangerous situations where ...

This is dangerous for several reasons; most importantly, if there's a poor connection or break in the grounding wire and the neutral wire, the parts of the grounding system on the far side of the break (from the panel) will ...

Either both sources are bonded and you switch the neutral, or neither source is, you don't switch it, and it's bonded.

Is it okay for the battery cabinet to have a neutral wire

Some of our favorite brands that don't need neutral wires are Lutron Caseta and GE CYNC. Just be aware that many of the switches that don't need neutral wires will need a smart hub to work.
