It's the biggest US site for recycling old photovoltaic panels, according to We Recycle Solar Inc., a four-year-old startup that owns the plant. The company sees a growing business ...

66-year-old Stephen McRae was arrested and booked on two counts of property damage/destruction worth more than \$5000, which are second-degree felonies, after allegedly breaking the solar...

On one side, fans of solar energy are pushing a cleaner alternative to fossil fuels, with massive solar projects popping up across the United States.

Inside a noisy industrial plant on the outskirts of Yuma, Arizona, there's a machine that smashes old solar panels into bits. It can handle 10 panels a minute, as many as 7,500 a day,...

As people see more grid-scale solar development (GSSD) pop up on the landscape, they may wonder if these installations have adverse effects on human or animal health.

For those who see a land-use challenge in the development of solar energy in rural communities, I can tell you the solution: Private property rights. Farmers who think solar panels make ...

In May 2021, Surry County's Board of Supervisors approved the construction of a 240-megawatt solar farm that spans 1,750 acres across Virginia's Surry and Isle of Wight counties. Rows ...

While photovoltaic (PV) renewable energy production has surged, concerns remain about whether or not PV power plants induce a "heat island" (PVHI) effect, much like ...

But an investigation by The Mail on Sunday has discovered that plans are in place to build large-scale solar farms right up to the boundaries of historic villages - in some cases even up to ...
