What is a traditional windmill database?

The objective of this website is to become the worldwide resource for all traditional windmills, serving as a central hub for information on the 3,000+ windmills currently in our database. Our traditional windmill database includes windmills from over 26 countries, and allows you to filter by location, mill type, mill function, and power source.

How many windmills are there in the Netherlands?

More than 1.000old windmills still exist in the Netherlands. The largest concentration of Dutch windmills can be found near the village of Kinderdijk ("Children's dike"). To drain the excess water from the polders,which are situated below sea-levels,19 windmills were built around 1740.

Which windmills were used in medieval Europe?

All the old windmills in medieval Europe rotated on horizontal axles. Two centuries later,areas of the Rhine River delta were drained by the famous Dutch windmills. 6. Rhodes Windmills The Mandraki Harbor was once the military port of ancient Rhodes and home to the famous Colossus of Rhodes,one of the Seven Wonders of the World.

Why are windmills significant or important?

For several centuries,windmills were not only created to serve specific functions that their machinery allowed,but also to be architectural and visual wonders that many countries and territories infused into their historical heritage. If you are interested in researching or visiting the most popular windmills,here you can find a list of them.
