New York, December 9, 2025 - lithium-ion battery pack prices have dropped 8% since 2024 to a record low of \$108 per kilowatt-hour, according to latest analysis by research provider BloombergNEF (BNEF).

The data includes an annual average and quarterly average prices of different lithium-ion battery chemistries commonly used in electric vehicles and renewable energy storage.

A boom in battery storage has bolstered the demand outlook for lithium in 2026, driving hopes for an accelerated turnaround for an industry struggling with oversupply.

High peak hour power prices in China have emerged as the driving force behind a revival in the price of lithium, a key battery metal, which has risen by 25% over the past four weeks, and 50%...

Lithium prices surge as EV and energy storage demand rises, tightening supply & fueling a market rebound with high stakes for stakeholders.

According to BNEF, battery pack prices for stationary storage fell to \$70/kWh in 2025, a 45% decrease from 2024. This represents the steepest decline among all lithium-ion battery use ...

Lithium carbonate futures surged past CNY 170,000 per tonne in January, gaining nearly 30% since the start of the year to a two-year high, as signs of strong demand for power storage coincided with the ...

While the pace of price decreases has slowed, lithium-ion battery packs have reached a new record low in 2025. According to the latest analysis by BloombergNEF (BNEF), prices have ...

Energy storage is emerging as the fastest-growing pillar of battery demand, with major implications for the lithium market heading into 2026. Indeed, according to Benchmark Mineral...

Chinese lithium prices are getting a boost from growing confidence in demand for large-scale battery storage.
