Around 25% of Tube stations which are "underground" now have mobile coverage. When combined with Tube stations which are above ground, means that more than two thirds of all stations ...

Victoria and Piccadilly line customers now starting to benefit from 4G and 5G mobile coverage, with further stations and tunnelled sections going live through Central London later this month

Currently around 10% underground tube stations have 4G and 5G mobile coverage. The first Tubes stations in London's West End have received high-speed mobile coverage. 4G and 5G is...

Transport for London (TfL) continues to roll out 4G and 5G mobile coverage across London's underground network, allowing more passengers to enjoy mobile service while travelling on the...

Sections of the network that have mobile connectivity within stations and tunnels are highlighted in green. Sections highlighted in orange are planned to open soon.

Mobile phone coverage has been expanded along more of the London Underground system, Transport for London (TfL) has announced.

You'll get a phone signal so long as you're on one of the four UK networks: EE, Vodafone, Three and VMO2. Your phone should automatically connect, and there is no extra charge. We'll chart ...

In total, 62 out of the 121 Tube stations located underground have been connected, along with the entire Elizabeth Line. Boldyn was awarded a 20-year concession by TfL in June 2021 to ...

Customers now have 4G and 5G mobile coverage in stations and tunnels on sections of the Circle, District, Central, Jubilee, Piccadilly, Bakerloo, Victoria and Northern lines, as well as the...
