How long is a microinverter warranty?

Microinverters often include a 20- to 25-year microinverter warranty. Because microinverters are installed on individual panels, a single inverter failure won't shut down your entire system. Many microinverter warranties cover both parts and labor, making repairs easier if issues arise.

What is a solar inverter warranty?

Here's a breakdown of solar inverter warranties by major manufacturers: When you choose Enphase microinverters, you're backed by the Enphase warranty, which gives you 25 years of coverage--matching the lifespan of most solar panels. That means your entire solar system is protected long-term.

How long is a power inverter warranty?

Usually, inverter manufacturers offer a standard warranty period of 10 years for string inverters, whereas module-level power electronics (MLPEs) like microinverters or power optimizers offer 25-year warranties. In the case of an extended warranty period, few manufacturers allow you to purchase extra warranty time for their products.

Do inverters have extended warranties?

Some manufacturers offer extended warranties for an additional cost, but coverage varies. While a standard inverter warranty typically covers defects and failures, extended warranties may extend coverage for parts, but not always labor or service costs. Some manufacturers provide refurbished replacements instead of new units.

Is your SolarEdge inverter not working? Learn about SolarEdge inverter warranty periods, Enphase coverage, and how to file a claim if your installer is gone. Protect your energy savings.
