Morocco's National Telecommunications Regulatory Agency (ANRT) expects to conduct its 5G spectrum auction by the end of 2023 or beginning of 2024. Each telecom operator is now lining up equipment ...

Implementation of the 5G deployment is set to begin by the end of 2025, with major urban centers prioritized in the initial rollout phase.

Head of Government, Aziz Akhannouch, announced on Friday in Rabat, that 5G technology is set to be deployed in several Moroccan countries, with a view of its progressive ...

Morocco's three major telecom operators switched on 5G today, casting the rollout as economic infrastructure meant to boost industry and bridge digital gaps.

The announcement comes as Morocco's 5G network deployment achieves remarkable early success. Just seven days after the official launch, approximately 60 cities nationwide are already covered...

Just a week into deployment, the country has already registered seven million active 5G devices connected to a network supported by over 6,000 base stations across 60 cities--a scale and ...

The Moroccan government is poised to finalize the deployment of 5G technology with the examination of a crucial decree this Thursday.

The rollout includes 6,000 active base stations, set to rise to 8,200 by the end of December. Operators have already connected 7 million 5G-compatible devices, signaling rapid ...

Moroccan digital experts say the uneven availability of 5G services since the network's official launch reflects a mix of technical and regulatory constraints rather than device quality.
