According to media reports, on the evening of February 13, 2022, an accident occurred at the Moss Landing energy storage power plant project in California, USA, in which about 10 battery shelves ...

A major fire in January at one of the world's largest battery storage plants in Moss Landing showered 55,000 pounds of toxic metals across the landscape within a mile of the plant, a new...

A massive fire broke out Thursday afternoon at the world's largest battery storage plants in Northern California, prompting evacuations and the closure of part of Highway 1.

That's essentially what happened during the 2022 Arizona battery facility incident - the Beyoncé of energy storage explosions, complete with emergency responders and viral drone footage.

A major fire erupted south of San Francisco at the Moss Landing Power Plant, forcing hundreds to evacuate. So far, the fire has stayed in the facility, which stores thousands of lithium ...

When a massive fire erupted at one of the world's largest lithium-ion battery storage facilities in Monterey County, it didn't just send plumes of smoke over nearby communities -- it cast ...

There were fires at the Vistra plant in 2021 and 2022 that were caused by a fire sprinkler system malfunction that resulted in some units overheating, The Associated Press reported.

A fire at the world's largest battery storage plant in Northern California is smoldering after sending plumes of toxic smoke into the atmosphere.

Let's catch up on what happened in this fire, what the lingering concerns are, and what comes next for the energy storage industry.

New energy storage power station explosion accident

When battery energy storage facilities burn, the makeup of the chemical fallout can be a mystery for surrounding communities. Yet, these batteries often contain metals that are toxic to...
