The costs of supercapacitors are tabulated in this data-file, with a typical system storing 15-seconds of electricity, for a capex cost around \$10,000/kWh of energy but just \$40/kW of power.

This market research report provides a comprehensive analysis of the global and regional Supercapacitors markets, covering the forecast period 2025-2032. It offers detailed insights into ...

Mouser offers inventory, pricing, & datasheets for Supercapacitors / Ultracapacitors.

Supercapacitor market was valued at USD 2.9 billion in 2024 and is estimated to grow at a CAGR of over 18.2% from 2025 to 2034 driven by rising demand for energy storage solutions.

In 2023, the average supercapacitor energy storage system ranged between \$3,000-\$5,000 per kWh - significantly higher than traditional batteries. But why does this gap exist, and ...

If you're researching energy storage for renewables, electric vehicles, or industrial applications, you've likely asked: "How much does a supercapacitor energy storage system cost per ...

Summary: Explore the latest trends in supercapacitor pricing and capacity metrics across industries like renewable energy, transportation, and industrial systems.

The global supercapacitor market was valued at approximately USD 2.94 billion in 2024 and is projected to reach around USD 14.74 billion by 2034, exhibiting a Compound Annual Growth Rate (CAGR) of ...

The global supercapacitors market size is projected to hit around USD 14.74 billion by 2034, increasing from USD 3.45 billion in 2025, with a CAGR of 17.50%.

Learn more about new Supercapacitors / Ultracapacitors at Mouser Electronics.
