What does a Norwegian solar company do?

Norwegian firms are involved in project development, operation and maintenance and/or ownership of large utility scale PV plants, as well as sales and installation of decentralized solar home systems or "pico" solutions, such as solar lamps or PV powered devices used in agriculture.

Can Norway engage in the production and use of solar photovoltaic (PV) technology?

In this report, we explore the conditions for Norway to engage in the production and use of solar photovoltaic (PV) technology, both nationally and globally. To analyze the Norwegian conditions, we perform an innovation system analysis of the Norwegian PV industry to identify strengths and weaknesses.

What is the Norwegian solar energy industry like?

The Norwegian solar energy industry is highly varied with both national and international activities across the PV value chain. Based on interview and survey results we group the firms in three groups; downstream national, downstream international and upstream.

What are the regulations for the Norwegian solar PV industry?

Following regulations for the Norwegian solar PV industry is critical. The supply companies acknowledge that any equipment that is delivered to Norway should be translated in a Scandinavian language with a Norwegian user manual for installation. Other regulations refer to CO2 footprint.
