What is an off-grid Solar System?

Off-grid systems are an ideal option for those faced with high grid connection costs, who live in remote locations or areas with unreliable grid power, or seeking total energy autonomy. Unlike grid-tied systems, off-grid solar setups must generate and store all the energy you need. The key components are typically:

Who is off grid solar?

Off Grid Solar is a company that has been established by solar professionals who have been working building and installing Off Grid Solar Energy Systems in New Zealand for more than a decade. We specialise in battery supported solar energy systems both grid connected (ESS) and Stand Alone Off Grid Solar Energy Plants.
